

REQUIREMENT ANALYSIS PHASE

Customer Support Ticket Priority Prediction and Automated Assignment System Using Agentforce

Requirement Analysis Phase

Based on your project PDF, the **Requirement Analysis Phase** contains these sections: Customer Journey Map, Functional Requirements, Non-Functional Requirements, Data Flow Diagram, and Technology Stack. Customer Support Ticket Priority.

Customer Journey Map

Ticket Creation → Account Identification → Ticket Retrieval → Description Analysis → Priority Classification → Agent Assignment → Urgent Task Creation → Support Handling → Resolution Customer Support Ticket Priority.

Functional Requirements

ID	Requirement
FR-1	Support ticket creation and management
FR-2	Account and Contact association
FR-3	Ticket description analysis
FR-4	Automatic priority classification
FR-5	High-priority task creation
FR-6	Support agent assignment
FR-7	SLA breach risk checking
FR-8	Agentforce conversational analysis

Non-Functional Requirements

Requirement	Description
Usability	Clear Agentforce interaction and understandable priority messages
Reliability	Consistent priority classification based on configured conditions

Performance	Quick retrieval and analysis of the latest support ticket
Security	Controlled Salesforce access to customer and ticket information
Maintainability	Flow and Agentforce configuration can be updated
Scalability	Supports increasing support-ticket volumes through Salesforce automation

Data Flow

Customer / Support Request

Account

Latest Support Ticket

Ticket Description

Analyze Description

Priority Level

High / Medium / Low Decision

Agent Assignment

High-Priority Task — if applicable

Final Response

For Agentforce:

User provides Account Name → Support Ticket Priority Analysis → Auto-Launched Flow → Ticket Analysis → Priority and Assignment Output → Response to User.

Technology Stack

Layer	Technology
Platform	Salesforce
Database	Support_Ticket_Intelligence__cwith Account, Contact, User and Task records
Logic	Auto-Launched Flow
AI	Agentforce
Agent Configuration	Support Ticket Priority Analysis subagent
Automation	Flow Decision, Assignment and Create Records
Output	Agentforce conversation response

CONCLUSION

“In the **Requirement Analysis Phase**, we identify what the system needs to do. The system should create and manage support tickets, associate them with customers and contacts, analyze the ticket description, automatically classify the ticket as High, Medium, or Low priority, create an urgent task for high-priority tickets, assign the appropriate support level, check SLA risk, and provide conversational analysis through Agentforce.”
